

THE MINUTES OF THE REGULAR MEETING OF THE MRAC HELD ON DEC. 14th, 1941.

The meeting was called to order at 8:00PM by Pres. Kircher .

Due to the length and the importance of the meeting the roll call minutes of the previous meeting and the Club Raffle were dispensed with.

Mr. Doyle addressed the Club on our part in Civilian Defense and introduced MR. Merten of the NYA who after his talk invited the Club in the name of the NYA to use their well equipped shops, their qualified personnel, their existing radio equipment and moneys to purchase the necessary new parts to launch our Club on a building program of interchangeable and portable Ultra High Frequency Equipment suitable for operating and maintaining a Civilian Defense Network locally. Even their clerical staff is to be at our service in this work. The Club to furnish operators and the technical brains to direct and supervise the actual work of construction of this equipment and the growth and operation of the local network.

The Board of Directors met and unanimously voted to accept this offer as did the full Club Membership.

The meeting was then turned over to our old friend Tom Baily of the Electric Co., who gave us a very interesting talk on "Interference Its Location And Correction." He illustrated his lecture with slides and the recordings of various interference sources.

A casual count before adjournment at 9:55PM showed 82 men present of whom 48 were Club Members.

Respectfully Submitted,

*Freid H. Burrows* Secy.
